

CAPS “The Common Automotive Platform Standard”

Claims Analysis Report
Wk. Ending 05/06

www.caps.co.uk

(Author - Kevern Thompson)

Claim Definition (CAPS Analysis)

Unique Claims

A claim that is initiated and seen for the first time “A single count”

Supply Chain Transmissions

The Unique Claim plus any additional transmission on the same claim, e.g. notification to a parts Vendor

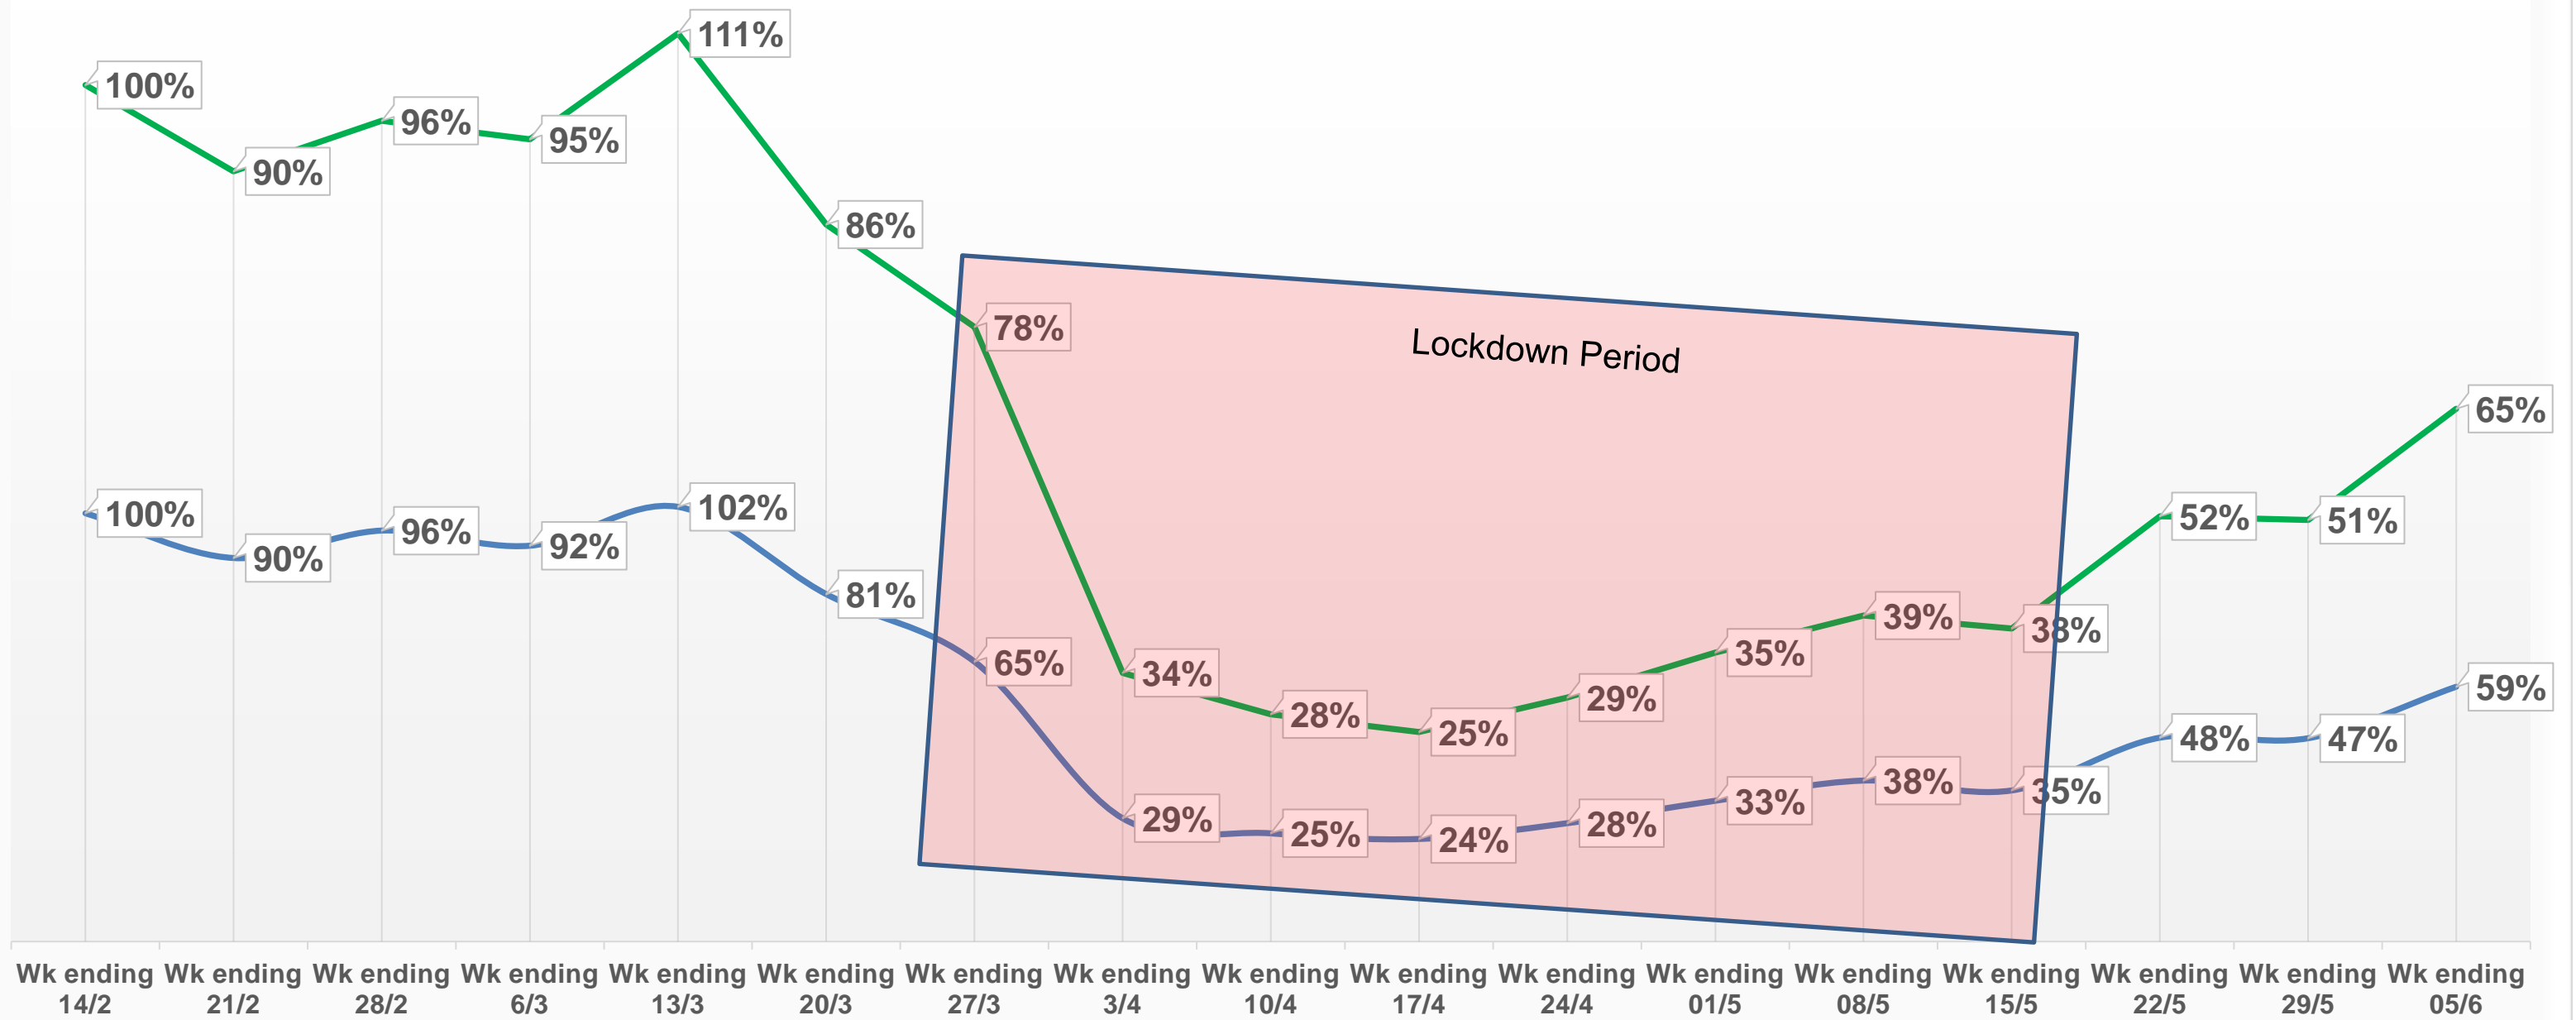

CAPS Operations

Daily activities performed by the CAPS platform facilitating the exchange process – x1m per day

Combined

Unique Claims
Supply Chain Transmissions

Volume Increase-Decrease

Unique Claims increases again by 14% from previous week's -1% fall back

Supply chain transmissions increase by 12% (Parts, Mobility, Systems)

The surge in claims continues with another 14% increase recorded last week, whilst the percentage increase is ironically the same from 3 weeks ago the volume increase is much larger. "Positive"

The regional growth has changed slightly from the previous 3 week increase and is shown below

Regions that recorded an increase from the previous surge to those same regions for last week (05/6);

| Wk. End 22/05 | Vs | Wk. End 05/06 |
|--------------------------|----|---------------|
| East Midlands: +1% | Vs | -0.9% |
| Republic of Ireland: +1% | Vs | -1.1% |
| South East: +1% | Vs | +1.2% |
| South West: +1% | Vs | +0.1% |

Previous week 05/6 analysis – Regional Growth

Regions that recorded an increase during the last week;

West Midlands: 0.4%
Greater London: 0.7%
North West: 1.1%
South East: 2%

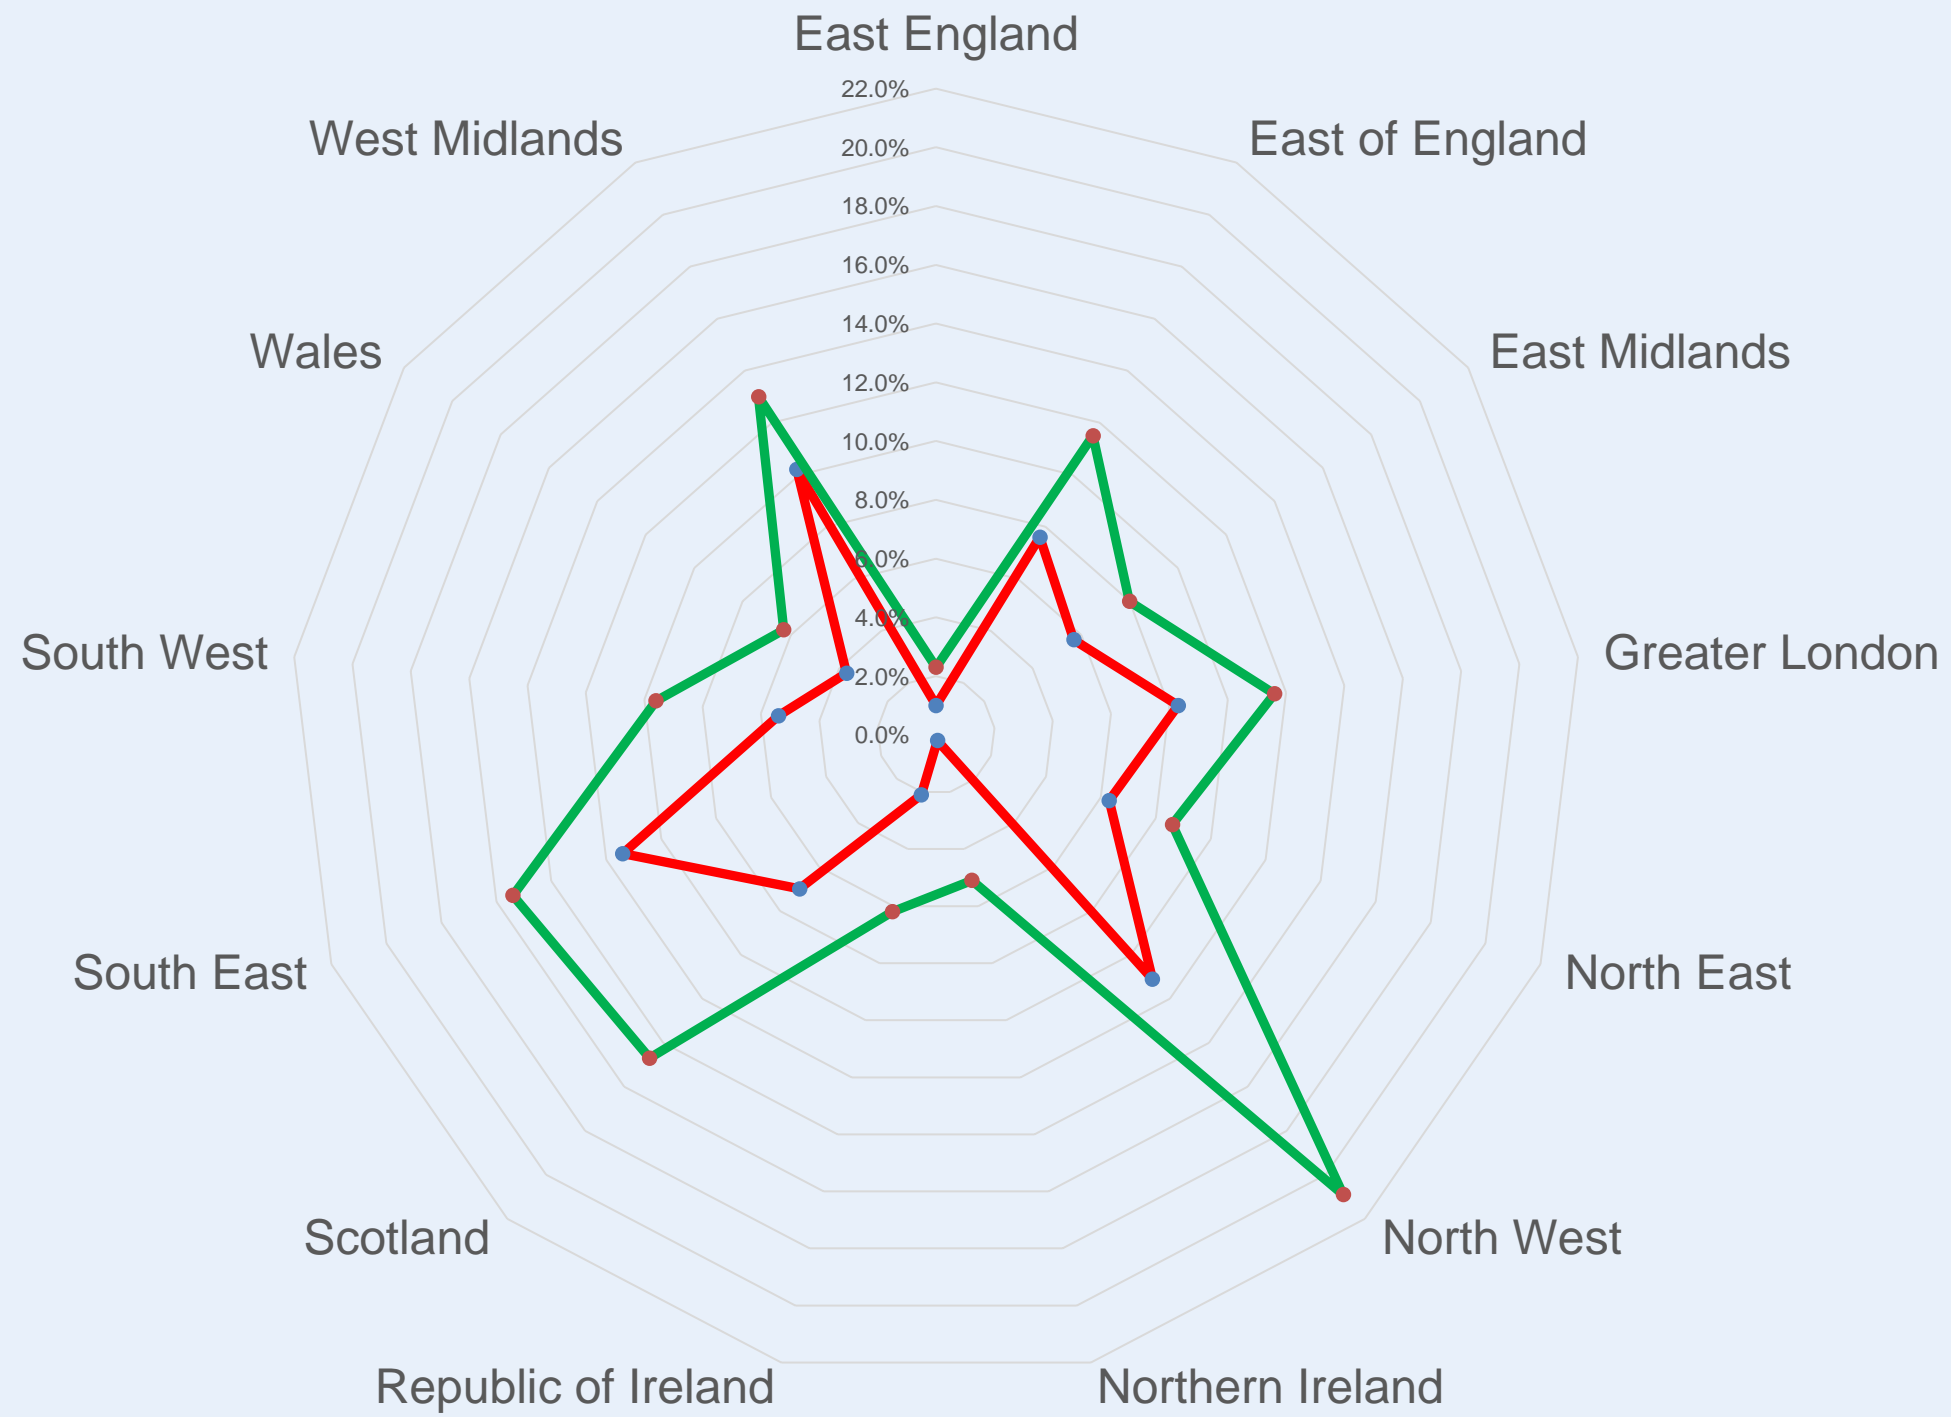

The above represents different regions to those of the previous recorded surge.

Lowest - Highest
Feb - June

● Lowest Point 07/2
● Highest Point 05/06
